To Whom It May Concern:

When we built our new facility in Cranston, RI several years ago, we decided to make the dealership state of the art in design and amenities. Our integrated collision center originally located in Seekonk required a complete new look with the latest in equipment technology to serve our growing customer base and existing patrons who have come to trust the Tasca family.

For our new spray booths, mixing room and dual prep station, we chose Managed Air Systems and Team Blowtherm booths based on our confidence in their organization to handle a job of this size and to keep their promises fulfilling our needs. They delivered a quality installation, exceptional product and service after the sale.

In addition to the booths, two new Atlas Copco rotary screw air compressors and Transair compressed air piping compliment our facility with reliable clean air for all our needs.

We are happy to have partnered with Managed Air Systems.

Sincerely,

Bob Tasca III
Vice President
